DIGITAL AUDIO 1

This course is designed to provide students with the basic knowledge and skills related to audio broadcasting and audio production. The course includes instruction and hands-on assignments in the following areas: radio, TV, podcasting, live sound, studio recording, and producing. Students will create original content through hands-on assignments.

- Students will understand the different types of audio production.
- Students will identify and demonstrate proper use of equipment and when to use it.
- Students will demonstrate an understanding of audio signal-path.
- Students should collaborate and produce different types of audio.
- Students will be able to understand and obey basic copyright laws applicable to all media.
- Students will understand the importance of career readiness skills as it relates to participating in either TSA (Technology Student Association), SkillsUSA, Utah Broadcast Awards, or any other related CTSO.
